

Petition addressed to the National Assembly

**In Quebec, the situation concerning pets is truly unacceptable.
The “Animal Health Protection Act” (P-42)
is not properly applied – That’s enough!**

Considering that the Quebec government has the responsibility and the moral duty to ensure the protection of consumers and animals.

Considering that Quebec was the last province to enact its law to protect animals and that this law to this day contains no acceptable standards that protect animals.

Considering that the SPCA, with 137 years of experience, has managed to gain the confidence of more that 83 % of the population (Léger Marketing – January 2005).

Considering that the SPCA is willing to put at the disposal of the Quebec government its infrastructure, its expertise, as well as its qualified inspectors.

Considering that the SPCA offers a training and awareness program that would allow the expansion of these services throughout the province at no cost to the taxpayers,

This is why, WE THE UNDERSIGNED, are asking the Quebec National Assembly to adopt a resolution mandating the SPCA and its affiliates with full power to apply the law concerning the well-being and the safety of animals “Animal Health Protection Act”(P-42), and to obtain from the government its firm commitment that it will create standards designed to protect the public and the animals.
